## Profile Summary

3rd-year CS student with industrial training at BHEL and 2 production-grade full-stack platforms built in Django, Next.js, and React — LLM integrations, payment gateways, and real-time WebSockets. CGPA 8.17. Open to full-stack, backend, and frontend internship roles.

## Experience

**Industrial Trainee, DTG Department** *Bharat Heavy Electricals Ltd. (BHEL), Bhopal | June 2026*

- Developed BHEL Connect, an internal employee marketplace and group-buying platform using Django REST Framework, React 18, PostgreSQL, and Redis — deployed on Vercel and Render
- Integrated WhatsApp Cloud API (Meta) into the BHEL Employee Hospital application for appointment notifications and patient communication workflows

## Technical Skills

- **Generative AI & ML:** LLM Integration, Prompt Engineering, AI Image Generation, ML Pipelines, scikit-learn
- **Languages:** Python, JavaScript, TypeScript, C++, SQL
- **Frontend:** React.js, Next.js, TailwindCSS, Redux, HTML5, CSS3
- **Backend:** Django, Django REST Framework, Node.js, Express.js
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Tools & Platforms:** Git, Docker, Vercel, Railway, Cloudinary, Postman
- **Salesforce:** Apex, Lightning Web Components

## Projects

**AdVision – Multi-Modal Generative AI Advertising Platform** GitHub | Live Demo

- Built a multi-modal Generative AI platform generating ad copy via LLM integration (DeepSeek V3) and marketing visuals via AI image generation (Stability AI, Pollinations AI) for Instagram, Facebook, LinkedIn, TikTok, and YouTube.
- Architected Django REST API with PostgreSQL featuring JWT auth, OAuth 2.0 Google sign-in, Fernet-encrypted API keys, CORS/CSRF policies, and Cloudinary CDN with automated platform-specific image optimization
- Built analytics dashboard with campaign tracking, A/B testing, and scikit-learn ML pipeline for performance forecasting
- *Tech Stack:* Django, PostgreSQL, React.js, scikit-learn, Cloudinary, DeepSeek V3, Stability AI, Pollinations AI, TailwindCSS, Recharts

**Get Me A Chai – AI-Powered Creator Monetization Platform** GitHub | Live Demo

- Built a Next.js 15 crowdfunding platform with a 200-frame Canvas API scrollytelling landing page, custom smooth scrolling (Lenis), and 10+ Server Action modules with role-based auth (NextAuth.js), Zod validation, and webhook signature verification
- Engineered Generative AI features using LLM integration via OpenRouter API, including a contextual chatbot, personalized recommendation feed, and a 7-step prompt-driven campaign wizard that auto-generated marketing copy, reward tiers, and FAQs.
- Built real-time notifications via Razorpay webhooks and Nodemailer SMTP, and a creator analytics dashboard with Chart.js tracking views, clicks, and conversions with automated PDF/CSV exports
- *Tech Stack:* Next.js 15, React, MongoDB, Razorpay, NextAuth.js, OpenRouter API, HTML5 Canvas, Lenis, Nodemailer, TailwindCSS, Zod, Recharts

## Certifications

- **AWS:** Generative AI Foundations
- **Google for Developers:** AI-ML Virtual Internship (10-week program via EduSkills)
- **Salesforce:** Agentforce Specialist, Platform Developer 1
- **GeeksForGeeks:** GfG 160 - 160 Days of Problem Solving

## Education

**B.Tech in Computer Science Engineering** | LNCT University, Bhopal *2023 – 2027*
CGPA: 8.17/10.0

## Leadership & Achievements

**Vice President, E-Cell** *LNCT University | 2024 - 2025*

- Organized startup competitions and connected 15+ student founders with industry mentors across 200+ participants
